

Hoang Tran

Software Engineer

Prague, Czechia

Software engineer with a background in human-computer interaction. I care about building products that feel right — thoughtful interfaces, clean architecture, and reliable systems. I take ownership end-to-end, from design through to production.

EXPERIENCE

2022 — Present

Software Engineer

Mews · Prague

Worked across two product teams in a hospitality platform used by 15,000+ properties across 85+ countries. Owned frontend features end-to-end — complex forms, data grids, and multi-property workflows. Extended the shared data-access framework with a cache update utility adopted company-wide. Drove the frontend testing initiative — authored an RFC that standardised testing practices across the engineering org.

React

TypeScript

Testing

2020 — 2022

Lead UX Designer

Centrum Znalostního Managementu · Prague

Led a UX team of 3. Created a design system and conducted user research for platforms used at CTU Faculty of Electrical Engineering.

UX Research

Design Systems
